

## Wisconsin Governor visits Performance Micro Tool

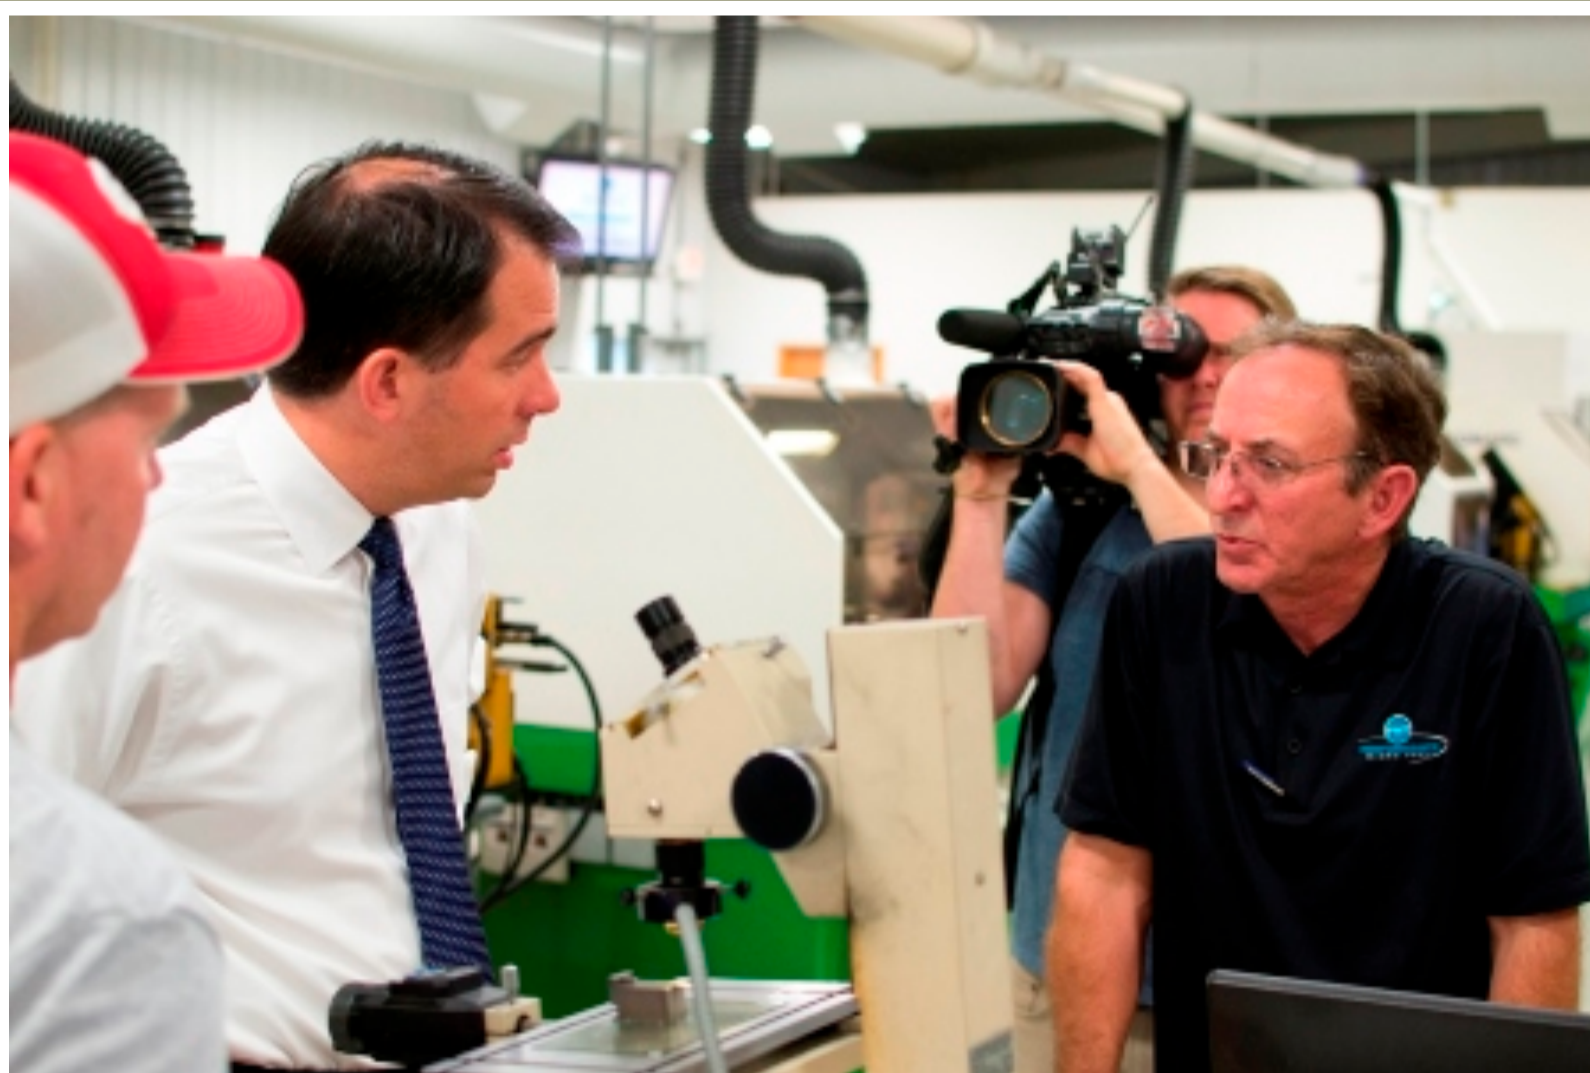

"Performance" was the theme for the day as Wisconsin Gov. Scott Walker visited Performance Micro Tool in Janesville, Wis., on Thursday, Sept. 18. The governor toured PMT offices and manufacturing facilities and took a quick course in micro endmills and drills.

In a speech to PMT staff and 100 invited guests, Gov. Walker talked about the need for performance in high-tech manufacturing and how PMT exemplified a company achieving the highest quality in its tools.

"For Performance Micro Tool, it's all about performance," he said. According to PMT President Dave Burton, it was an honor to have the governor visit the company. "Scott Walker has demonstrated his commitment to manufacturing in Wisconsin. My employees and I were thrilled that he chose to visit our headquarters."
